At the Mountain Midwifery Center we strive to give families and pregnant people impeccable care. One aspect of prenatal care is performing laboratory tests that keep clients and their infants healthy. The following laboratory screening tests will be explained to you and will be ordered as part of healthy pregnancy surveillance and as required by our Colorado Birth Center Regulations. Please sign and date this form, giving Mountain Midwifery Center the ability to obtain these common laboratory screening tests.

- Complete Blood Count
- Blood type
- Rh and antibody screen (for all clients, if necessary on newborn cord blood)
- Rubella status
- Hepatitis B and C
- Syphilis
- Gestational Diabetes Screening
- Toxoplasmosis screening (optional)
- Cystic Fibrosis screening (optional)
- Group B Streptococcus
- HIV (separate consent)
- Pap smear (if clinically indicated)
- Chlamydia
- Gonorrhea
